
Taxonomy – Use it on Legacy EDI Claims Now!

Taxonomy codes are national codes used by providers to indicate the type of services and products they deliver. The taxonomy code associated with your enrollment record will be **required** in the new ND Health Enterprise MMIS. This requirement excludes Qualified Service Providers (QSP) and "atypical" providers who do not furnish direct healthcare services. Claims must be submitted with both your National Provider Identifier (NPI) and your Taxonomy code combination. Without the NPI and Taxonomy combination **your claims will deny**. Please make sure you are using the taxonomy code that was assigned during the re-enrollment process.

In preparing for the new system, we are now instructing providers to include their taxonomy code on Legacy MMIS electronic claims to begin adjustment to the new requirements.

A recent review of Legacy MMIS electronic claims submissions revealed that over half of the claims do not include the billing provider taxonomy. Of those claims with taxonomy included, a significant percentage of these claims had the incorrect taxonomy. It is imperative that all providers verify and confirm that their billing office or billing vendor have the correct taxonomy and NPI information for all individual and group providers in your practice.

The ND valid taxonomy codes are available at <http://www.nd.gov/dhs/info/mmis/materials.html>.

The taxonomy code associated with your enrollment record is available for lookup by NPI at <http://www.nd.gov/dhs/info/mmis/docs/mmis-taxonomy-codes.pdf>.

Additional information regarding taxonomy & ND Health Enterprise Fact Sheets are posted on the department's website at <http://www.nd.gov/dhs/info/mmis/factsheets.html>.
