

Common Questions about Vaccines

Question

01

Are vaccine's safe?

Yes. Millions of individuals safely receive vaccines each year. The most common side effects are very mild, such as pain or swelling at the injection site.

Question

02

Is it better to get sick with a disease than get a vaccine for it?

No. These diseases can be a serious, especially among young children, older adults, and people with certain chronic health conditions, such as asthma, heart disease or diabetes.

Question

03

Aren't all the serious disease's gone? Why keep vaccinating?

If we stopped vaccinating, the few cases we have in the United States could very quickly become tens or hundreds of thousands of cases.
