

North Dakota Immunization Information System: Immunization Forecaster

- 1.) Login to the NDIIS
- 2.) Click on the **Search** hyperlink in the Client Box on your home screen
- 3.) Search for your patient in the **Client Lookup** window using a combination of first name, last name, and date of birth

Client Lookup

Help

Basic Search

Birth:

First: Last:

The easiest way to search for a patient is by using their birthdate and the first letter of their first name

- 4.) Select the correct patient from the generated list by double-clicking their line from the list or by clicking their name on the list once and clicking the **Inquire** button.
- 5.) The system will then open the patient's record to the **Demographics** tab

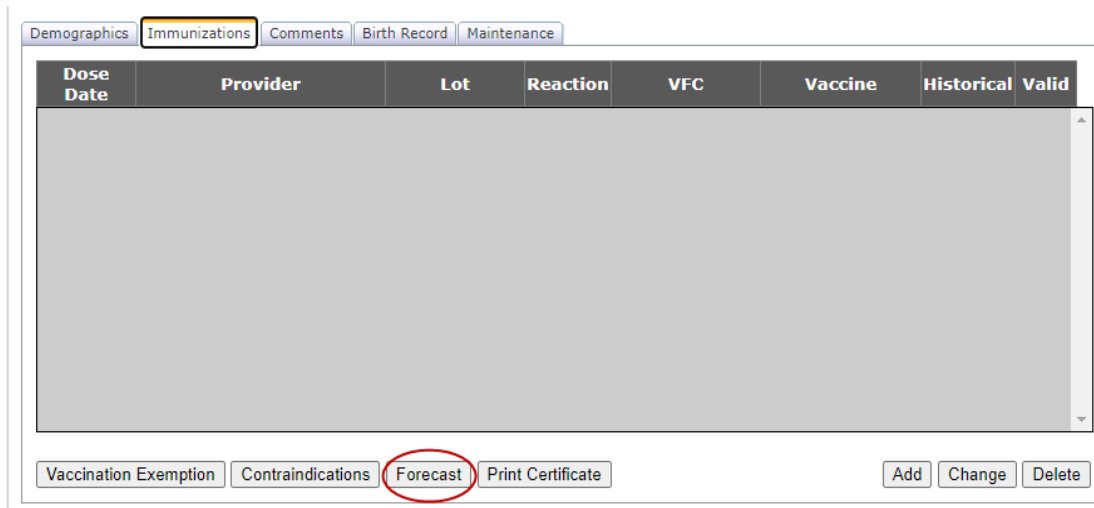

Demographics Reminder:

Review and update any patient information that is no longer current and fill in any information that may be missing.

6.) To access the Immunization Forecaster, click on the **Immunizations** tab under the patient's name.

7.) From the patient's immunization screen, click the **Forecast** button.

8.) The patient's **Immunization Forecast** document will open as a PDF containing the following information:

- A. Patient name, birthdate and age (in days, weeks and years)
- B. Vaccination Summary – lists all valid doses of vaccine that the patient has received
- C. Vaccine Forecast – lists all vaccines that the patient is past due and or coming due for, and includes:
 - Vaccine type
 - Dose number in series
 - Recommended date of administration — according to the ACIP age-based vaccine recommendations
 - ◆ Vaccines with a recommended date before today's date will show up in red text
 - Minimum valid date — earliest date the vaccine can be given and still be counted as a valid dose)
- D. Any comments relating to invalid doses of vaccine in the patient's record and/or vaccine exemption

If there are any exemptions on a patient's record, the Forecaster will not forecast for that particular vaccine

* This is not an official document of Immunization.

Client Immunization Forecast
Evaluated On 6/16/2023 5:21:19 PM

Name: Test A Testing-Rotavirus
Birthdate: 5/17/2015
Age: 421 weeks, 97 months, 8 yrs
